Grant Harris

Software Developer

New York, New York | grantharris38@gmail.com | LinkedIn | Github | Portfolio

SUMMARY: A proficient programmer with a strong foundation in various programming languages and a passion for AI-driven solutions. Grant's ability to solve complex coding problems is complemented by his talent to explain technical solutions clearly. He writes blog posts showing how he solves LeetCode-style problems and utilizes openAI to better understand. With a focus on producing high-quality code, he has a proven track record in both development and code evaluation, ensuring optimal outcomes in AI training and other software endeavors.

Front-End Skills: HTML5 | React.js | Tailwind CSS | JavaScript | Bootstrap | Typescript | Next.js

Backend/ Database: Java | Python | Node.js | Express.js | MongoDB | AWS Serverless | Docker

Tools and Deployment: Git | CI/CD | Agile Methodology

Additional Skills: Secure Coding Practices (OWASP) | OAuth | API First Driven Concepts | DevOps Practices | Distributed Systems Design | Agile Methodology

EXPERIENCE

Full Stack Engineer | Chenery & Company, Inc. | Remote | June 2023 - Present
- Spearheaded the development of 'Cinematic', a cloud-native social media platform, from scratch, ensuring scalability and resilience.
- Regularly solved intricate coding challenges, emphasizing not just solution development but also the explanation of the underlying logic.
- Reviewed and evaluated the code for correctness and performance, ensuring the delivery of optimal solutions.

Full Stack Engineer| TR LLC | New York, NY July 2023 - Present
- Built and deployed platform capabilities, collaborating with business and UX teams to deliver optimal user experiences.
- Leveraged Git and Jira for source code management, CI/CD, and agile project management.
- Designing and implementing APIs for streamlined data access and manipulation.

SEI Immersive Fellow | General Assembly | New York, NY | April 2023 - July 2023
- Gained hands-on experience with distributed system design, focusing on scalability and reliability.
- Engaged in intensive coding sessions, often tackling problems reminiscent of those on platforms like LeetCode and HackerRank learning Big O, Agile development, and algorithmic optimization.
- Developed a solid understanding of OAuth and ensured secure coding practices in all projects.

Social Media Strategist | Incontrera Consulting | New York City (remote) | June 2022–February 2023
- Orchestrated social media strategies reaching thousands,
- Reported, audited, managed, scheduled, and analyzed client strategy and social media performances
- Used analytics and Asana to schedule and optimize posting times, platform, copy

Customer Success Agent | FedEx Dataworks | New York City (remote) | September 2021 –June 2022
- Provided emails, live chat response, and phone calls to user and client base 40+ hours a week
- Coordinated with brands at local stores to offer coordination to users for live short-order delivery windows

PORTFOLIO PROJECTS

- **Cinematic**: Social Media platform for movie discussions and events. Technologies: **Next.js | TypeScript | Tailwind | Postgres | Prisma | GoogleMaps API | OMDb API**
- **AI-Poll** | Secure digital platform for discussion & voting Technologies: **React | Django REST framework | PostgreSql | MetaMask | Ethereum Network | JSON Web Token**
- **RevRadar** | Reliable car listing platform. Technologies: | **MERN | JSON Web Token**

EDUCATION

Software Engineer Fellow Graduate | **General Assembly** | New York, NY | 2023

Bachelor's Degree in Communication | **University of Miami** | Miami, FL | 2015
